Thermochimica Acta 247 (1994) 467–474

thermochimica acta

Subject index

Acridine
Étude thermodynamique de l'acridine 201
Activation energy
On the suitability of controlled transformation rate thermal analysis (CRTA) for kinetic studies. Part 3. Discrimination of the reaction mechanism of dolomite thermolysis 321
The possibility of identification of activation energy by means of the temperature criterion 389
Activity coefficient
Thermodynamic investigations of liquid-Te-saturated CdTe–ZnTe solid solutions 415
Aerosol
Kinetic thermometric determination of vanadium in atmospheric aerosols based on its catalytic effect on the oxidation of tannic acid by bromate ion 457
Alcohol
Solution enthalpies of 2-chloro-2-methylpropane in the binary alcoholic mixtures methanol–1,2-ethanediol, ethanol–1,2-ethanediol and 2-methoxyethanol–1,2-ethanediol 265
Algorithm
Rate-controlled organic burnout of multilayer green ceramics 431
Alkane
Excess molar enthalpies of cycloalkanol + *n*-alkane mixtures under high pressure 283
Alkanol
Excess molar enthalpies of cycloalkanol + *n*-alkane mixtures under high pressure 283
The role of hydrophilic interactions in determining preferential configurations in aqueous solution: alkan-1-ols, alkan-1,2-diols, alkan-α,ω-diols, and α-aminoacids interacting with glycine and its oligomers at 298.15 K 273
Amino acid
Spectroscopic characterization and thermal behavior of two sugar α-amino acids 439
The role of hydrophilic interactions in determining preferential configurations in aqueous solution: alkan-1-ols, alkan-1,2-diols, alkan-α,ω-diols, and α-aminoacids interacting with glycine and its oligomers at 298.15 K 273
Anoxia
Direct calorimetry of aquatic animals: automated and computerized data-acquisition system for simultaneous direct and indirect calorimetry 209

Benzoate
The thermodynamics of benzoate complexes of copper(II) and iron(III) in aqueous solution 407
Binary system
Excess molar enthalpies of cycloalkanol + *n*-alkane mixtures under high pressure 283
Heats of mixing of binary mixture of pyridine bases and *o*-xylene. Experimental results and description according to the theory 237
Solution enthalpies of 2-chloro-2-methylpropane in the binary alcoholic mixtures methanol–1,2-ethanediol, ethanol–1,2-ethanediol and 2-methoxyethanol–1,2-ethanediol 265
Bromate
Kinetic thermometric determination of vanadium in atmospheric aerosols based on its catalytic effect on the oxidation of tannic acid by bromate ion 457
Burnout
Rate-controlled organic burnout of multilayer green ceramics 431
Burnup
High-temperature heat capacities and electrical conductivities of UO_2 doped with simulated fission products for 2–10 at% burnup 225

Calibration
The caloric calibration of scanning calorimeters 129
Calorimeter
The caloric calibration of scanning calorimeters 129
Calorimetry
Direct calorimetry of aquatic animals: automated and computerized data-acquisition system for simultaneous direct and indirect calorimetry 209
Solution enthalpies of 2-chloro-2-methylpropane in the binary alcoholic mixtures methanol–1,2-ethanediol, ethanol–1,2-ethanediol and 2-methoxyethanol–1,2-ethanediol 265
Thermodynamic behavior and mechanisms of deformation of phase-separated multiblock copolymers as revealed from deformation calorimetry 19
Carassius auratus L.
Direct calorimetry of aquatic animals: automated and computerized data-acquisition system for simultaneous direct and indirect calorimetry 209
Cement
Effect of temperature on the hydration of ordinary Portland cement in the presence of a superplasticizer 381
Ceramic
Rate-controlled organic burnout of multilayer green ceramics 431
Coal
The possibility of identification of activation energy by means of the temperature criterion 389
Computer
Direct calorimetry of aquatic animals: automated and computerized data-acquisition system for simultaneous direct and indirect calorimetry 209
Conductivity
High-temperature heat capacities and electrical conductivities of UO_2 doped with simulated fission products for 2–10 at% burnup 225
Simultaneous determination of potassium and caesium by the decomposition of nitritocuprates(II) of the lead group 357
Copolymer
Thermodynamic behavior and mechanisms of deformation of phase-separated multiblock copolymers as revealed from deformation calorimetry 19
Copper compound
The thermodynamics of benzoate complexes of copper(II) and iron(III) in aqueous solution 407
Cyclohexane
Excess enthalpies and excess heat capacities of the ternary system ethanol + tetrahydrofuran + cyclohexane at 298.15 K 293
CRTA
On the suitability of controlled transformation rate thermal analysis (CRTA) for kinetic studies. Part 3. Discrimination of the reaction mechanism of dolomite thermolysis 321
Physicochemical properties of liquid–solid interfaces by means of controlled rate thermal analysis 169
Rate-controlled organic burnout of multilayer green ceramics 431

DC
Work, heat and stored energy in compressive plastic deformation of glassy polymers 1
DDP
Sodium di-*n*-dodecylphosphate vesicles in aqueous solution: effects of added ethanol, and Ca^{2+} and Na^{+} ions on the gel–liquid phase transition 341
Decomposition
Dependence on temperature of the results of the vacuum stability test for explosives 447
Deconvolution
Using thermoanalytical data. Part 7. DSC/DTA/DTG peak shapes depending on operational settings, equipment features, sample kinetic and thermodynamic parameters 347
Deformation
Heating effects in the deformation of thermoplastics 87
Quantitative measurement of the heat exchange during deformation using an infrared camera 55
Thermal calorimetry of polymer simple shear deformation and its applications 35
Thermodynamic behavior and mechanisms of deformation of phase-separated multiblock copolymers as revealed from deformation calorimetry 19
Work, heat and stored energy in compressive plastic deformation of glassy polymers 1
Degree of conversion
The possibility of identification of activation energy by means of the temperature criterion 389

Detonation
Dependence on temperature of the results of the vacuum stability test for explosives 447
Dipicolinic acid
Preparation and properties of rare earth element complexes with pyridine-2,6-dicarboxylic acid 329
DMF
Ionization thermodynamics of weak acids in water/DMF mixtures at 298.15 K 315
Doping
High-temperature heat capacities and electrical conductivities of UO_2 doped with simulated fission products for 2–10 at% burnup 225
DSC
Application of differential scanning calorimetry to the study of latex stability 369
Heating effects in the deformation of thermoplastics 87
Spectroscopic characterization and thermal behavior of two sugar α-amino acids 439
The caloric calibration of scanning calorimeters 129
Thermal stability of melanin 377
Using thermoanalytical data. Part 7. DSC/DTA/DTG peak shapes depending on operational settings, equipment features, sample kinetic and thermodynamic parameters 347
Work, heat and stored energy in compressive plastic deformation of glassy polymers 1
DTA
Étude thermodynamique de l'acridine 201
Preparation and properties of rare earth element complexes with pyridine-2,6-dicarboxylic acid 329
Rate-controlled organic burnout of multilayer green ceramics 431
Simultaneous determination of potassium and caesium by the decomposition of nitritocuprates(II) of the lead group 357
Using thermoanalytical data. Part 7. DSC/DTA/DTG peak shapes depending on operational settings, equipment features, sample kinetic and thermodynamic parameters 347
DTG
Effect of temperature on the hydration of ordinary Portland cement in the presence of a superplasticizer 381
Physicochemical properties of liquid–solid interfaces by means of controlled rate thermal analysis 169
Preparation and properties of rare earth element complexes with pyridine-2,6-dicarboxylic acid 329
Simultaneous determination of potassium and caesium by the decomposition of nitritocuprates(II) of the lead group 357
The possibility of identification of activation energy by means of the temperature criterion 389

EMF
Thermodynamic investigations of liquid-Te-saturated CdTe–ZnTe solid solutions 415
Enthalpy
Enthalpie de sublimation ou vaporisation de quelques dérivés méthylés du benzène 193
Ethanol
Excess enthalpies and excess heat capacities of the ternary system ethanol + tetrahydrofuran + cyclohexane at 298.15 K 293
Sodium di-*n*-dodecylphosphate vesicles in aqueous solution: effects of added ethanol, and Ca^{2+} and Na^{+} ions on the gel–liquid phase transition 341
Excess enthalpy
Excess enthalpies and excess heat capacities of the ternary system ethanol + tetrahydrofuran + cyclohexane at 298.15 K 293
Excess heat capacity
Excess enthalpies and excess heat capacities of the ternary system ethanol + tetrahydrofuran + cyclohexane at 298.15 K 293
Excess heat of mixing
Heats of mixing of binary mixture of pyridine bases and *o*-xylene. Experimental results and description according to the theory 237
Excess molar enthalpy
Excess molar enthalpies of cycloalkanol + *n*-alkane mixtures under high pressure 283
Explosive
Dependence on temperature of the results of the vacuum stability test for explosives 447

Film
Physicochemical properties of liquid–solid interfaces by means of controlled rate thermal analysis 169
Fission product
High-temperature heat capacities and electrical conductivities of UO_2 doped with simulated fission products for 2–10 at% burnup 225

Fusion
Enthalpie de sublimation ou vaporisation de quelques dérivés méthylés du benzène 193

GEFTA
The caloric calibration of scanning calorimeters 129
Glassy polymer
Work, heat and stored energy in compressive plastic deformation of glassy polymers 1
Glycine
The role of hydrophilic interactions in determining preferential configurations in aqueous solution: alkan-1-ols, alkan-1,2-diols, alkan-α,ω-diols, and α-aminoacids interacting with glycine and its oligomers at 298.15 K 273
Goldfish
Direct calorimetry of aquatic animals: automated and computerized data-acquisition system for simultaneous direct and indirect calorimetry 209

HDPE
Specific features of the thermoelastic effect in polymers 121
Heat capacity
Étude thermodynamique de l'acridine 201
High-temperature heat capacities and electrical conductivities of UO_2 doped with simulated fission products for 2–10 at% burnup 225
Heat exchange
Quantitative measurement of the heat exchange during deformation using an infrared camera 55
Heat of atomization
Étude thermodynamique de l'acridine 201
Heat of dilution
The role of hydrophilic interactions in determining preferential configurations in aqueous solution: alkan-1-ols, alkan-1,2-diols, alkan-α,ω-diols, and α-aminoacids interacting with glycine and its oligomers at 298.15 K 273
Heat of formation
Standard enthalpies of formation and sublimation of some crystalline bis(8-hydroxyquinolate) metal complexes 245
Heat of hydrolysis
Standard enthalpies of formation and sublimation of some crystalline bis(8-hydroxyquinolate) metal complexes 245
Heat of ionization
Ionization thermodynamics of weak acids in water/DMF mixtures at 298.15 K 315
Heat of mixing
Heats of mixing of binary mixture of pyridine bases and *o*-xylene. Experimental results and description according to the theory 237
Heat of solution
Solution enthalpies of 2-chloro-2-methylpropane in the binary alcoholic mixtures methanol–1,2-ethanediol, ethanol–1,2-ethanediol and 2-methoxyethanol–1,2-ethanediol 265
Heat of sublimation
Étude thermodynamique de l'acridine 201
Standard enthalpies of formation and sublimation of some crystalline bis(8-hydroxyquinolate) metal complexes 245
Hexamethylbenzene
Enthalpie de sublimation ou vaporisation de quelques dérivés méthylés du benzène 193
HGa
Spectroscopic characterization and thermal behavior of two sugar α-amino acids 439
HMa
Spectroscopic characterization and thermal behavior of two sugar α-amino acids 439
Hookean
Heating effects in the deformation of thermoplastics 87
Hydration
Effect of temperature on the hydration of ordinary Portland cement in the presence of a superplasticizer 381
Hydrophilic
The role of hydrophilic interactions in determining preferential configurations in aqueous solution: alkan-1-ols, alkan-1,2-diols, alkan-α,ω-diols, and α-aminoacids interacting with glycine and its oligomers at 298.15 K 273
Hydrophobic
The role of hydrophilic interactions in determining preferential configurations in aqueous solution: alkan-1-ols, alkan-1,2-diols, alkan-α,ω-diols, and α-aminoacids interacting with glycine and its oligomers at 298.15 K 273
Hydroxyquinolate
Standard enthalpies of formation and sublimation of some crystalline bis(8-hydroxyquinolate) metal complexes 245
Hypoxia
Direct calorimetry of aquatic animals: automated and computerized data-acquisition system for simultaneous direct and indirect calorimetry 209

Hysteresis
Thermodynamic behavior and mechanisms of deformation of phase-separated multiblock copolymers as revealed from deformation calorimetry 19

Iron compound
The thermodynamics of benzoate complexes of copper(II) and iron(III) in aqueous solution 407
IRS
Spectroscopic characterization and thermal behavior of two sugar α-amino acids 439
Isokinetics
The possibility of identification of activation energy by means of the temperature criterion 389
Isothermal
Dependence on temperature of the results of the vacuum stability test for explosives 447

Kinetics
Kinetic thermometric determination of vanadium in atmospheric aerosols based on its catalytic effect on the oxidation of tannic acid by bromate ion 457
On the validity of the steady-state approximation and of two-term rate equations in non-isothermal kinetics. Reply to H.P. Nawada 455
Using thermoanalytical data. Part 7. DSC/DTA/DTG peak shapes depending on operational settings, equipment features, sample kinetic and thermodynamic parameters 347

Lanthanon
Preparation and properties of rare earth element complexes with pyridine-2,6-dicarboxylic acid 329
Latex
Application of differential scanning calorimetry to the study of latex stability 369
LDPE
Constrained equilibrium in network-like polymer systems: a concept of irreversible thermodynamics 65
Specific features of the thermoelastic effect in polymers 121
Living system
Direct calorimetry of aquatic animals: automated and computerized data-acquisition system for simultaneous direct and indirect calorimetry 209

Mechanism
Microscopics of the thermoelastic effect 111
On the suitability of controlled transformation rate thermal analysis (CRTA) for kinetic studies. Part 3. Discrimination of the reaction mechanism of dolomite thermolysis 321
The possibility of identification of activation energy by means of the temperature criterion 389
Work, heat and stored energy in compressive plastic deformation of glassy polymers 1
Melanin
Thermal stability of melanin 377
Methodology
Simultaneous determination of potassium and caesium by the decomposition of nitritocuprates(II) of the lead group 357
Model
Excess enthalpies and excess heat capacities of the ternary system ethanol + tetrahydrofuran + cyclohexane at 298.15 K 293
Microscopics of the thermoelastic effect 111
Thermodynamic investigations of liquid-Te-saturated CdTe–ZnTe solid solutions 415

Necking
Quantitative measurement of the heat exchange during deformation using an infrared camera 55
Network
Constrained equilibrium in network-like polymer systems: a concept of irreversible thermodynamics 65
Nitritocuprate
Simultaneous determination of potassium and caesium by the decomposition of nitritocuprates(II) of the lead group 357
Nitrogen oxide
Simultaneous determination of potassium and caesium by the decomposition of nitritocuprates(II) of the lead group 357
Non-isothermal
On the validity of the steady-state approximation and of two-term rate equations in non-isothermal kinetics. Reply to H.P. Nawada 455

Oxidation
Kinetic thermometric determination of vanadium in atmospheric aerosols based on its catalytic effect on the oxidation of tannic acid by bromate ion 457

Oxygen
Direct calorimetry of aquatic animals: automated and computerized data-acquisition system for simultaneous direct and indirect calorimetry 209

Peak shape
Using thermoanalytical data. Part 7. DSC/DTA/DTG peak shapes depending on operational settings, equipment features, sample kinetic and thermodynamic parameters 347
Pentamethylbenzene
Enthalpie de sublimation ou vaporisation de quelques dérivés méthylés du benzène 193
PFP
Heats of mixing of binary mixture of pyridine bases and *o*-xylene. Experimental results and description according to the theory 237
pH
Application of differential scanning calorimetry to the study of latex stability 369
Phase transition
Sodium di-*n*-dodecylphosphate vesicles in aqueous solution: effects of added ethanol, and Ca^{2+} and Na^{+} ions on the gel–liquid phase transition 341
Thermal stability of melanin 377
PID
Rate-controlled organic burnout of multilayer green ceramics 431
Pigment
Thermal stability of melanin 377
Plasticizer
Effect of temperature on the hydration of ordinary Portland cement in the presence of a superplasticizer 381
Polycarbonate
Quantitative measurement of the heat exchange during deformation using an infrared camera 55
Polymer
Constrained equilibrium in network-like polymer systems: a concept of irreversible thermodynamics 65
Heating effects in the deformation of thermoplastics 87
Quantitative measurement of the heat exchange during deformation using an infrared camera 55
Specific features of the thermoelastic effect in polymers 121
The possibility of identification of activation energy by means of the temperature criterion 389
Thermal calorimetry of polymer simple shear deformation and its applications 35
Work, heat and stored energy in compressive plastic deformation of glassy polymers 1
Constrained equilibrium in network-like polymer systems: a concept of irreversible thermodynamics 65
Polymeric glass
Quantitative measurement of the heat exchange during deformation using an infrared camera 55
PID
Rate-controlled organic burnout of multilayer green ceramics 431
PP
Specific features of the thermoelastic effect in polymers 121
PZT
Rate-controlled organic burnout of multilayer green ceramics 431

Rate jump
On the suitability of controlled transformation rate thermal analysis (CRTA) for kinetic studies. Part 3. Discrimination of the reaction mechanism of dolomite thermolysis 321
Relaxation
Constrained equilibrium in network-like polymer systems: a concept of irreversible thermodynamics 65
Resonance energy
Étude thermodynamique de l'acridine 201

Shear
Thermal calorimetry of polymer simple shear deformation and its applications 35
Sodium compound
Sodium di-*n*-dodecylphosphate vesicles in aqueous solution: effects of added ethanol, and Ca^{2+} and Na^{+} ions on the gel–liquid phase transition 341
Solid solution
Thermodynamic investigations of liquid-Te-saturated CdTe–ZnTe solid solutions 415
Solvation
Solution enthalpies of 2-chloro-2-methylpropane in the binary alcoholic mixtures methanol–1,2-ethanediol, ethanol–1,2-ethanediol and 2-methoxyethanol–1,2-ethanediol 265

Stability
Application of differential scanning calorimetry to the study of latex stability 369
Dependence on temperature of the results of the vacuum stability test for explosives 447
Physicochemical properties of liquid–solid interfaces by means of controlled rate thermal analysis 169
Thermal stability of melanin 377
Sublimation
Enthalpie de sublimation ou vaporisation de quelques dérivés méthylés du benzène 193
Superplasticizer
Effect of temperature on the hydration of ordinary Portland cement in the presence of a superplasticizer 381
Surface
Physicochemical properties of liquid–solid interfaces by means of controlled rate thermal analysis 169

Tannic acid
Kinetic thermometric determination of vanadium in atmospheric aerosols based on its catalytic effect on the oxidation of tannic acid by bromate ion 457
Temperature criterion
The possibility of identification of activation energy by means of the temperature criterion 389
Ternary system
Excess enthalpies and excess heat capacities of the ternary system ethanol + tetrahydrofuran + cyclohexane at 298.15 K 293
The role of hydrophilic interactions in determining preferential configurations in aqueous solution: alkan-1-ols, alkan-1,2-diols, alkan-α,ω-diols, and α-aminoacids interacting with glycine and its oligomers at 298.15 K 273
Tetramethylbenzene
Enthalpie de sublimation ou vaporisation de quelques dérivés méthylés du benzène 193
TG
Preparation and properties of rare earth element complexes with pyridine-2,6-dicarboxylic acid 329
Rate-controlled organic burnout of multilayer green ceramics 431
Simultaneous determination of potassium and caesium by the decomposition of nitritocuprates(II) of the lead group 357
Spectroscopic characterization and thermal behavior of two sugar α-amino acids 439
Thermal stability of melanin 377
TGA
Physicochemical properties of liquid–solid interfaces by means of controlled rate thermal analysis 169
Thermodynamics
Constrained equilibrium in network-like polymer systems: a concept of irreversible thermodynamics 65
Ionization thermodynamics of weak acids in water/DMF mixtures at 298.15 K 315
The thermodynamics of benzoate complexes of copper(II) and iron(III) in aqueous solution 407
Thermodynamic behavior and mechanisms of deformation of phase-separated multiblock copolymers as revealed from deformation calorimetry 19
Thermodynamic investigations of liquid-Te-saturated CdTe–ZnTe solid solutions 415
Thermoelastic
Microscopics of the thermoelastic effect 111
Specific features of the thermoelastic effect in polymers 121
Thermoelectric
Specific features of the thermoelastic effect in polymers 121
Thermolysis
Dependence on temperature of the results of the vacuum stability test for explosives 447
Thermoplastic
Heating effects in the deformation of thermoplastics 87
Thermovision
Heating effects in the deformation of thermoplastics 87
THF
Excess enthalpies and excess heat capacities of the ternary system ethanol + tetrahydrofuran + cyclohexane at 298.15 K 293
Triple point
Enthalpie de sublimation ou vaporisation de quelques dérivés méthylés du benzène 193

UNIFAC
Excess enthalpies and excess heat capacities of the ternary system ethanol + tetrahydrofuran + cyclohexane at 298.15 K 293
Uranium oxide
High-temperature heat capacities and electrical conductivities of UO_2 doped with simulated fission products for 2–10 at% burnup 225

Vacuum stability test
Dependence on temperature of the results of the vacuum stability test for explosives 447
Vanadium
Kinetic thermometric determination of vanadium in atmospheric aerosols based on its catalytic effect on the oxidation of tannic acid by bromate ion 457
Vaporization
Enthalpie de sublimation ou vaporisation de quelques dérivés méthylés du benzène 193
Vitiligo
Thermal stability of melanin 377
Water
Ionization thermodynamics of weak acids in water/DMF mixtures at 298.15 K 315
Weak acid
Ionization thermodynamics of weak acids in water/DMF mixtures at 298.15 K 315

XRD
Effect of temperature on the hydration of ordinary Portland cement in the presence of a superplasticizer 381
Thermodynamic investigations of liquid-Te-saturated CdTe–ZnTe solid solutions 415
